EDUCATION

- **Georgia Institute of Technology** Remote
Master of Science in Computer Science; AI Specialization Jan. 2026 – Jan. 2028
- **Indian Institute of Technology (IIT), Roorkee** Roorkee, India
Bachelor of Technology in Electrical Engineering; GPA: 7.482/10.0 July 2014 – May 2018
- **Sri Chaitanya IIT Academy** Vijayawada, India
Senior School Certificate Examination; Marks: 969/1000 April 2012 – May 2014
- **Triveni School** Khammam, India
Secondary School Certificate Examination; GPA: 9.7/10.0 March 2012

RELEVANT COURSEWORK

Computer Networks, Programming in C++, Database Management Systems, Machine Learning, Web Designing and Development, Robotics and Control, Microprocessors and Peripheral Devices, Single Chip Microprocessor and its Applications, Mathematical Methods

TECHNICAL SKILLS AND EXPERTISE

- **Skills:** Data Structures and Algorithms, OOPs, LLD, HLD, Design Patterns, API Design, Machine Learning, LLM Development
- **Programming Languages:** C++, Python, Golang, C
- **Areas of Interest:** Distributed Systems, Machine Learning, Operating Systems, Computer Networking
- **Dev Tools and Software:** Vim, Git, GitHub, Jira, MySQL, Docker CLI

PROFESSIONAL EXPERIENCE

- **Meta Platforms** London, United Kingdom
Senior Software Engineer Sept. 2025 – Present
 - Currently working in the Applied AI Org, focusing on Agent Data & Optimization for coding models (Post-Training, Model Understanding, Building Evals, Benchmarking).
 - Previously Tech lead for Fraud Deception team. Setting up technical direction for 4 Engineers on the team.
 - Previously worked on Scams & Deceptive Identity problem areas across Facebook and Instagram.
 - Built a highly precise appeals LLM on IG to reduce Abusive clears as part of the Appeals flow.
 - Built a scalable and extensible policy enforcement infrastructure to trigger ML and LLM-based scam classifiers on various events such as User Reports (Profile, Content, Message) and Follow requests across Instagram.
 - Built a heuristics-based policies infrastructure to contain scams. This is being used across many policies in the org.
- **Google IT Services India** Bengaluru, India
Senior Software Engineer Oct. 2024 – Aug. 2025
 - Served as Tech Lead for the monetization, billing, and invoicing platform on the Google Pay for Business team.
 - Responsible for setting technical direction for 4 engineers on the team.
 - Collaborated with PMs, EMs, and other TLs to prioritize and plan upcoming projects.
- **Google IT Services India** Bengaluru, India
Software Engineer May 2022 – Oct. 2024
 - Worked in the Google Pay for Business Merchant Services team to provide value-added services to merchants.

- Designed and developed the payment collection link feature to enable merchants to collect payments via URLs sent through the GPay Consumer app, SMS, or WhatsApp.
- Designed and implemented a core billing and invoicing infrastructure from scratch for product monetization across Google Pay.
- Modelled subscriptions, collected dues, managed reminder automation, and established proactive cancellation policies for services like RuPay Card transactions, Merchant Credit, and Soundpod.
- Engineered the invoicing infrastructure to generate monthly invoices efficiently for millions of GPay merchants.

- **Pensando Systems India Pvt. Ltd.**

Member of Technical Staff

Bengaluru, India

April 2020 – May 2022

- Developed an in-house Software Load-balancer application on top of NFF-GO with REST API and packet path support for Microsoft Azure.
- Designed and developed a CPS (connections per second) display feature by implementing a sliding window with counters algorithm in a multi-threaded environment, achieving 99.5% accuracy.
- Designed and implemented a Fastpath networking feature on top of Vector Packet Processor (VPP) for Microsoft Azure.
- Worked on LSPAN, RSPAN, and ERSPAN packet mirroring protocols on the Distributed Services Card platform for cloud environments.
- Developed a simulation pipeline and integrated it with test frameworks to improve testing speed and efficiency.

- **Cisco Systems India Pvt. Ltd.**

Software Engineer

Bengaluru, India

Aug. 2018 – April 2020

- Worked on auto-provisioning, event manager, and port-profile manager features of the Data Center Nexus OS.
- Contributed to model-driven programmability of Nexus OS to support REST API configurations.

- **Rupeek Fintech Pvt. Ltd.**

Research Intern

Bengaluru, India

May 2017 – July 2017

- **Stone Weight Deduction from the Images of Jewels:** Researched, implemented, and deployed a highly accurate image processing algorithm to efficiently deduct stone pixels from jewel imagery.

PROJECTS

- **Animals Recognition from Images**

Guide: Prof. Indra Gupta, EE Department, IIT Roorkee

B.Tech Project

Oct. 2017 – March 2018

- Explored various state-of-the-art neural network architectures.
- Developed a deep learning model in Python using the Keras library to achieve high accuracy for the identification of animals from images and video.

- **Martian Harmony Robotic Band**

Model and Robotics Section, IIT Roorkee

SRISHTI 2016 Competition

Jan. 2016 – March 2016

- Worked on the guitar-playing bot of the robotic band.
- Obtained a note-versus-time map for a song using MIDI software. The map was integrated into an Arduino Mini to control servo motors with respect to time so that actuators hit the correct notes on the guitar.

- **Automatic License Number Detection of Vehicles**

Guide: Prof. R.S. Anand, EE Department, IIT Roorkee

B.Tech Term Project

Jan. 2017 – April 2017

- Explored various state-of-the-art image processing algorithms to identify text.
- Developed an image processing algorithm to detect vehicle license plates from images using OpenCV on a Raspberry Pi 3.

SCHOLASTIC ACHIEVEMENTS

- **Joint Entrance Examination (2014):** Secured an All India Rank of **1728** (Open Category) in JEE Advanced among 1.4 million candidates.
- **EAMCET (2014):** Secured a State Rank of **312** (Open Category) in EAMCET among 280,000 candidates.
- **IIT Roorkee Merit-cum-Means Scholarship:** Awarded the academic scholarship **8** times for excellent performance.
- **Best Project Award at IIT Roorkee:** Awarded Best Project in Arts and Technology at the **SRISHTI 2016** exhibition for the Martian Harmony project.
- **Connected Recognition Award at Cisco Systems:** Recognized for exceptional engineering contributions toward the development of the Cisco Nexus Operating System.

EXTRACURRICULAR AND VOLUNTEERING ACTIVITIES

- **Volunteer at Child Rights and You (CRY)** IIT Roorkee
Core Volunteer *2015 – 2017*
 - Taught underprivileged students, facilitated school admissions, organized science exhibitions, and coordinated clothes/gift donation drives.
- **National Cadet Corps (NCC)** IIT Roorkee
Cadet *2014 – 2017*
 - Participated in formal parades during Independence Day and Republic Day, and actively organized various social awareness rallies.
